STATUS

5th-Yr MBBS Student

PROGRAM

Univ. of Port Harcourt

GRAD

Expected 2027

STACK

Python · NLP · Bayesian ML

ASSESSMENT

5th-year medical student building at the intersection of clinical medicine and health technology, focused on low-resource and non-Western clinical contexts. Combines frontline clinical exposure with hands-on ML/NLP work and health-tech product teardowns to find where clinical software fails atypical presentations — and to fix it. Seeking a clinical product / clinical intelligence role at a health-tech company as the next step before any independent venture.

FINDINGS

— PROJECTS

NaijaTriageAI — Offline-First Clinical Triage PWA

Flask · Supabase · PWA

- Built an installable, offline-first triage tool covering chest pain and maternal/neonatal emergencies (PPH, neonatal asphyxia) for low-connectivity clinical settings.
- Designed Bayesian probability models calibrated to Nigerian disease-prevalence data, closing a gap left by triage tools built on Western epidemiological priors.
- Backend on Flask/Supabase (Render); frontend deployed via GitHub Pages.

github.com/onwunaru760-a11y/triageAI

Sickle Cell Disease NLP Phenotyping Pipeline

Bio+ClinicalBERT · UMAP · HDBSCAN

- Built an NLP pipeline to extract and cluster sickle cell disease phenotypes from unstructured clinical notes in the PMC-Patients corpus.
- Used Bio+ClinicalBERT embeddings with UMAP dimensionality reduction and HDBSCAN clustering; GradientBoostingClassifier for downstream classification.

Health-Tech Product Teardowns — Ada Health

Product Writing

- Authored three long-form pieces on Ada Health's symptom-checker: a clinical product teardown, a patient-facing explainer, and B2B marketing copy.
- Core finding across all three: Ada's general-population probabilistic model underperforms on atypical presentations and non-Western disease-prevalence patterns — the same gap NaijaTriageAI was built to close.

onwunaru760-a11y.github.io/Portfolio-Content

HISTORY

— BACKGROUND

SEO Copywriter & Long-Form Content Strategist

Freelance

Clients across multiple continents, prior to and alongside medical training

- Wrote SEO copy and long-form content strategy across industries; this background underpins the clarity and persuasion in the clinical teardown and product-writing work above.

MBBS — University of Port Harcourt

Expected 2027

5th Year — Clinical postings in Obstetrics & Gynaecology, Paediatrics

PROCEDURES

— SKILLS

CLINICAL

Clinical reasoning across O&G, Paediatrics & Internal Medicine rotations; triage protocol design

TECHNICAL

Python, SQL, Flask, Supabase, GradientBoostingClassifier, Bio+ClinicalBERT, UMAP, HDBSCAN

PRODUCT & WRITING

Clinical product teardowns, SEO/long-form content strategy, B2B health-tech marketing copy
